C.E.M. CERTIFICATE

This certificate must be uploaded to your Online Account before arrival at Park Paddocks/outside standing.

The Vendor or his/her Agent is solely responsible for the accuracy of this certificate.

To be completed by a Veterinary Surgeon:
Two clitoral swabs (fossa and sinuses) should be taken at least 7 days apart. One set of swabs should be dated **WITHIN 30 DAYS OF THE SALE (i.e. from January 5th onwards).** Swabs must be submitted to a Laboratory approved by the Horserace Betting Levy Board (HBLB) in the United Kingdom or to National Approved Laboratories in all other countries and be cultured under both aerobic and microaerophilic conditions or tested by PCR.

On the ……..…… and …… (Dates, please see above) swabs were obtained from the **CLITORIS (FOSSA AND SINUSES)** of the filly ……..……. (Name) and submitted for bacteriological examination for C.E.M. at the ……..……Laboratory and cultured under both aerobic and microaerophilic conditions or tested by PCR.

The results were negative. Neither Klebsiella pneumoniae nor Pseudomonas aeruginosa were isolated.
